

PUBLIC SPACE, **PRIVATE FEEL**

PUBLIC RESTROOMS BROCHURE

DESIGN
MEETS
FUNCTION

SLEEK AND **MODERN**

Geberit brings modern design into the public restroom. Now you can replace typical public toilets and urinals with sleek, modern fixtures designed to make public restrooms more inviting and easier to use. Read on to discover the many advantages of the Geberit system in public spaces.

And prepare to be inspired.

SIMPLE BEAUTY

GEBERIT HELPS YOU CREATE A PUBLIC RESTROOM WITH ALL THE COMFORT OF A PRIVATE BATHROOM.

GEBERIT SYSTEMS OPEN UP DRAMATIC DESIGN POSSIBILITIES. LIFT THE TOILET OFF THE FLOOR AND HIDE UNSIGHTLY PLUMBING HARDWARE WHILE OFFERING VISITORS THE CONVENIENCE AND SAFETY OF HANDS-FREE FLUSHING.

Integrating a Geberit in-wall system in a public or semi-private restroom has never made more sense.

Safely hidden behind the wall, Geberit systems create clean lines and an uncluttered space. Design the restroom you imagine – and your clients deserve – without being limited by the requirements of typical plumbing hardware.

Hygiene in public restrooms is a paramount concern. That's why Geberit systems for toilets and urinals offer

hands-free, sensor-activated flushing. An infrared beam instantly detects the visitor and automatically flushes when they step away. Reliable detection that adjusts for variations in clothing and lighting allows reduced distance between adjacent urinals and walls, opening up more usable space.

Geberit electronic actuators offer additional features that promote hygiene in public restrooms. Automatic trap-filling prevents stubborn odors that can occur if the trap is siphoned empty. An automatic hygiene flush, pre-programmed for 24-hour intervals, prevents stagnation in the toilet and pipes.

Concerned about water conservation and sustainability? Every Geberit system for wall-hung toilets offers built-in dual-flush technology. Restroom visitors save water

with every flush. Achieve even greater water savings with the 0.125 GPF (0.9 LPF) or 0.5 GPF (1.9 LPF) Geberit urinal system. Finally, our touchless actuators use minimal power and offer other options to help you reduce power consumption.

Whether you select manual or electronic actuation, "in the wall" does not mean "out of reach." The fill and flush valves and the supply stop are hidden from sight but easily accessible through the actuator flush panel for tool-free maintenance. Service the system easily and have it up and running again in minutes, minimizing disruption and downtime.

CHOOSE FROM A RANGE OF MATCHING TOILET AND URINAL ACTUATORS THAT FEATURE ELEGANT SIMPLICITY AND ROBUST, RELIABLE OPERATION.

Finish	Toilet Flush			Urinal Flush	
	Manual	Touch-free with manual override	Touch-free (AC or DC)	Manual	Touch-free (AC or DC)
Brushed stainless steel					
Matte black with gloss black accent (Note: Type 50 urinal flush plate is brushed black chrome, not matte black.)					
Gloss black with matte black accent					

*NOTE: Not all styles and finishes are available in every configuration. See page 6 for complete compatibility information.

UNMATCHED FLEXIBILITY

BENEFITS OF GEBERIT IN PUBLIC SPACES

When you specify Geberit for your public spaces, you'll discover the real-world benefits of our in-wall systems for wall-hung fixtures.

GEBERIT INSTALLATION SYSTEMS KEEP THE UNSIGHTLY OUT OF SIGHT. SAFELY HIDDEN BEHIND THE WALL, GEBERIT DUOFIX CARRIERS ALLOW UNIQUE BEAUTY FROM FLOOR TO CEILING. SIMPLE, ELEGANT FLUSH ACTUATORS ARE DESIGNED TO MIX WELL WITH ANY DECOR, FROM PLAYFUL TO SERENE.

DESIGN FLEXIBILITY

Hiding the toilet tank in the wall opens up space in the restroom, making it an ideal choice for confined spaces. The adjustable-height carrier allows you to position the toilet 15" to 19" off the floor and the urinal 17" to 24" off the floor to meet ADA requirements or personal preference.

HYGIENE

Electronic actuation automatically flushes the fixture after each use, eliminating the need to touch the unit. Because the toilet and urinal are lifted off the floor, maintenance personnel can easily clean and thoroughly disinfect the entire restroom.

WATER SAVINGS

Geberit puts sustainability at your fingertips, bringing real water savings through 0.125 GPF (0.9 LPF) or 0.5 GPF (1.9 LPF) for urinals or 1.60/0.8 GPF (6/3 LPF) or 1.28/0.8 GPF (4.8/3 LPF) dual-flush technology for toilets.

STRENGTH AND STABILITY

The Geberit Duofix Carrier supports up to 880 lbs. (400kg) for toilets and 110 lbs. (50kg) for urinals, exceeding ASME A112.6.2 strength requirements.

EASY MAINTENANCE

The Geberit toilet system offers easy access to all internal components, including the fill and flush valves, through decorative actuator flush panels. No tools are needed for simple maintenance.

GEBERIT DUOFIX CARRIERS

Installing Geberit carriers is easy.

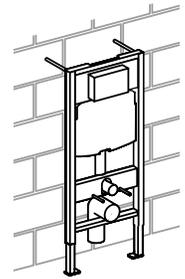

They require either a 2"×4" or 2"×6" wood frame or metal frame construction. The studs must be placed 19¾" apart (clearance) where the carrier will be positioned inside a wall. Frame to wall anchors are available for pre-wall installations.

www.geberit.us

Geberit North America is part of the Geberit Group, a European market leader and global provider of sanitary technology. Located in Des Plaines, Illinois, Geberit North America provides concealed tank and carrier systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding the unsightly toilet tank. Replacing a standard tank and toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation.
